

## **BRIDGER VALLEY ELECTRIC ANNOUNCES BOARD ELECTION**

The Bridger Valley Electric Board has set the date and location of the 2020 Annual Meeting of the members. The meeting will take place in the Lyman High School on Saturday, April 25, 2020. As in years past, it will be held in conjunction with the Bridger Valley Health Fair and Business Expo. A pancake breakfast will be served starting at 8:00 a.m. and Annual Meeting will begin at 10:00 a.m.

At this year's meeting two director seats are up for election. The election this year includes District 1, Mountain View area (including Uintalands and Manor Lands in the Bear River area) and District 4, McKinnon, Manila, Dutch John areas. These two board seats are currently held by Gary Nix (District 1) and Clark Anderson (District 4). If anyone is interested in running for these positions, they should contact Bridger Valley Electric as soon as possible.

Directors must live in the district they wish to represent. They must be of high integrity and be willing to do their due diligence as a director to make sure the Co-op stays financially sound. They must also be available for training to learn about the business of electric cooperatives. Some positions on the board require representing Bridger Valley Electric on other boards such as Deseret Power, Wyoming Rural Electric Association and Utah Rural Electric Cooperative Association. The BVEA board typically meets the second Tuesday of each month for most of the day.

Interested parties may run for the positions by having 15 bona fide members of their district sign a petition. The petition must be presented to Bridger Valley Electric by Friday, March 13, 2020 at 4 p.m. You are encouraged to return your petition before that date however so that you may have information published about your candidacy in the April WREN Magazine and the Annual Meeting booklet. Printing deadlines require the petition and information be returned by March 6th.

If you are interested in running for a board position please contact Bridger Valley Electric as soon as possible.
